Graduate Programs.

MASTER OF EDUCATION IN EDUCATIONAL TECHNOLOGY (MEET)

Rochat
School of Business

Interested in studying an online degree program?

Rochat online education programs are ideal for those who aspire to build a new career with a balance of time for work, study and life. Graduates gain practical knowledge to help them achieve personal and professional goals. Open new horizons, learn and achieve- all while you continue working!

Master of **Education in Educational Technology**

The Master of Education in Educational Technology (MEET) focuses on skills for improved performance at all levels of education, in the classroom and beyond.
Course work focuses on theoretical foundations, hands-on technology skills, and integration strategies for today's learning environments.

Balance your work, life, and educational goals by studying online.

The MEET program will allow you to become a better leader and a stronger educator. Learn to master your skills.

GRADUATE PROFILE:

Graduates from the Master of Education in Educational Technology program are prepared to design, develop, implement, and advise educational technology programs in diverse face-to-face and online educational settings. Some will work in elementary, middle, high schools and higher education institutions where they integrate technology in their classrooms, mentor peers, or serve as technology coordinators. Others work as faculty in higher education, instructional designers, librarians, or educational administration.

QUICK FACTS:

- Learn the how and why of using technology in student-centered ways to engage your students
- Focus on integrating technology into your classroom to help your students meet their goals
- Assignments and projects are directly applicable to your teaching context
- Combines Educational Technology theory and practice
- Not a computer savvy? Not a problem!
- 12-month Accelerated program + Teaching & Learning with Values seminar
- 100% online — all courses are online, interactive, and asynchronous
- Be recognized as an educational technology leader

WHAT WILL I LEARN?

The MEET program will introduce you to a wide-range of concepts and ideas that will enhance what you do as an educator. The program is a mixture of theory and practice. You will explore current trends and issues in educational technology. We will examine issues related to equality , inclusion and the use of technology. You will consider the role technology plays in your classroom and how it can be best used to meet the needs of your learners. A major goal of the program is to help you take what you learn and experience in the program and make it work for you and your students in your unique context.

TOPICS AND CONTENT AREAS

- Distance education and how it enhances what you do in your classroom
- Problem-solving in teaching & learning and the role of technology
- Making and Makerspaces
- Students as creators
- Instructional design and how it can help teachers design technology-mediated instructional experiences
- Design Thinking and how this can be used with students
- Designing and developing instructional media that can be used by your students
- Using the Internet for instruction
